

AEROWAGEN

A unique body package for your C7 Corvette

CALLAWAY
POWERFULLY ENGINEERED AUTOMOBILES™

In the tradition of coach-built shooting brakes

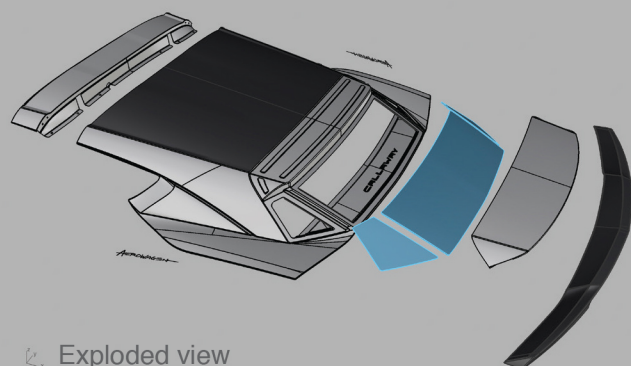

AEROWAGEN

In the tradition of coach built shooting brakes, the Callaway AeroWagen™ package is now offered for the Corvette Coupe. The package components can be fitted to the standard production 2014-2018 Chevrolet Corvette, the Callaway SC627 Stingray or Grand Sport, or the Callaway SC757 Z06.

The Callaway AeroWagen™ hatch assembly is a part-for-part replacement of the original equipment Corvette rear hatch, using the original hardware and latching mechanisms. It operates in an identical fashion.

AeroWagen package components are supplied ready to assemble. No fabrication is required. Carbon fiber moldings are pre-finished with UV protectant surface coat, prepared for paint-to-match options. Rear window panels are tempered safety glass and retain defogger functionality. The original Corvette hatch can be re-installed.

Installation is performed at Callaway facilities in California and Connecticut, as well as at Authorized Callaway/Chevrolet Dealers.

Deutschman-sculpted, integrated design
